THE CHARLEROI MAIL

L. XIII. NO. 290 CHARLEROI, WASHINGTON CO., PA., TUESDAY, JULY 1, 1913 ONE CE

RL IS RUN DOWN BY AUTO; MAY DIE

ght-Year Old Daughter of M. and Mrs. L. F.Hardesty is Victim

PURELY AN ACCIDENT

Carl Bumbaugh, of Monessen Was Driving Machine at Slow Speed

As the result of being run down by an automobile, Dorsie Hardesty,aged 8 years, the daughter of Mr. and Mrs. L. F. Hardesty, of 739 McKean avenue is in the Monessen-Charleroi hospital in a critical condition According to the attending physicians she suffered a fractured skull in the accident. The automobile which struck the little girl was one owned by W. S. Bumbaugh, of Monesen,and was driven by his son Carl Bumbaugh. The young man gave bond in the sum of $500 before Justice of the Peace Harry W. Scott, at North Charleroi, for his appearance.

The little girl was playing with others about McKean avenue and Eighth street, the story is told, her father and mother being away from the house for a short time. She was on the east side of the street. The automobile approached from Seventh street, running witnesses state at a slow rate of speed. The horn was tooted.

Just as the car approached Eighth street the girl is said to have darted across the street. She was struck and thrown aside. She lit at the curb unconscious, and was caried into a nearby store. Doctors were summoned by the auto driver, and after every possible attention was given the child, she was rushed to the hospital in the machine which struck her. It is believed that her head was struck at the base of her skull by a spring of the machine.

The girl had not regained consciousness at noon today and was being closely watched. No complications had developed at that time, and it is hoped that none wil ldevelop.

TWENTY-TWO DEATHS ARE INVESTIGATED

Twenty-two violent deaths occurred in Washington county during the month of June. The mines claimed the largest number of victims. Coroner James Heffran who investigated all of the deaths has the following report for the month:

Railroads	
Trespassing, male	1
Train jumping, boy	1
Suicide	
Shooting	1
Cutting throat	1
Drownings	
Intoxicated, adult	1
Bathing, adult	1
Bathing, boys	3
Mines	
Electrocutions	3
Motor collision	1
Crushed by wagons	2
Falls of slate	2
Other Causes	
Found dead on street railway	1
Natural gas explosion, mine	1
Struck by automobile, child	1
Concealment of birth	1
Kicked by horse	1

Editor Only an Amateur

When it Comes to Cussing, They Say, Watch Out for Donora Folks

If reports are true Donora has a school board that has congressional committees and legislativecommittees squeezed out of the handbook when it comes to real thrilling goings on. According to stories published in the American the school board goes into executive session whenever things seem to be getting warm, and that is about every meeting. Some of the members are expert cussing men, in fact to hear one or two of them according to reports, one would think they were ox drivers, so proficient and picturesques in their vocabulary are they. They go into executive session and then it is stated nobody interferes with their "personal liberty." The press representative is not permitted, of course to attend the star chamber sessions, for the reason that the editor of the American who though a newspaper man beside the school board members is a rank amateur at cussin' and might through jealously print the proceedings.

LAW TO BE ENFORCED RIGIDLY

Burgess Risbeck Makes Proclamation for the Fourth

CARE MUST BE TAKEN

Burgess George W. Risbeck today issued his proclamation governing Fourth of July celebration. It follows:

"In view of the dangers attending the sale and use of explosion, I hereby call atention of the public and dealers to the following State law, which will be rigidly enforced by the police of Charleroi on the Fourth:

"It shall be unlawful for any person to set off, fire or make use of for the purpose of explosion, any firecrackers over six inches in length and any firecracker over three and one-half inches to six inches in length, over three-quarters of an inch in diameter and any firecracker to the length of three and one-half inches over one inch in diameter, or to set off fire or explode in any county in the Commonwealth any fire-cracker or fireworks containing picric acid or picrates, dynamite or other high explosive compounds; or to explode any blank cartridge, pellet or tablet, containing dynamite or other high explosive compound, when used in pistols, hollow canes or any toy for explosive purposes."

OPERATIONS CARRIED ON BY PICKPOCKETS

Heavy Losses Reported Because of Their Recent Activity--Sunday Seems to be Their Best Day

Pickpockets are making merry at the expense of people of Charleroi and surrounding towns. They are mostly operating on trolley cars, it is stated and Sunday seems to be a good day.

On last Sunday a haul of an aggregate sum of $241 was secured it is stated by pickpockets from their operations on the Pittsburg and Charleroi car line. "Jack" Horner of Monessen, a bartender at the Westmoreland hotel, at that place was one to suffer. He lost $94, which was removed from his hip pocket. He thinks the work was done while a crowd was getting off a car at the Monessen-Charleroi bridge. He went to the car barn to report his loss and while he was there two foreigners came in to report losses. One complained that $35 had been extracte from his pocket and the other said he had lost $112.

Other losses have been reported within the last few weeks. It is stated the pickpockets frequent the cars because of the crowds that ride them. The Pittsburg Railways company are unable to locate any clews as to the pickpockets, who seem to be professionals. One method they use is to slash pockets Two work together, one jostling the victim while the other secures his roll of money

FIRE MARSHAL GIVES ADVICE FOR FOURTH

Says Every Precaution is Necessary to Prevent Disastrous Fires

Joseph L. Baldwin, state fire marshal, has issued a bulletin warning the public against fire losses on the Fourth andurging asafe and sane observance, as well as extra precautions on the part of all property holders and fire departments. State Marshal Baldwin says:

The Fourth of July, which is and should be a day of Patriotic rejoicing, has become a day of apprehension and terror to all persons who have any concern for the safety of life and property. It is a day when fire departments in all cities and towns are generally kept on the run. The people have not yet learned the significance of the day in its highest and best sense. They have not yet learned that noise is not patriotism.

Other countries show their patriotism in a more quiet manner with considerably less loss of life and property, and this country in the earlier days celebrated the Fourth of July by the unfurling of the Stars and Stripes, a salute of guns, ringing of church bells and patriotic songs and speeches. The fire cracker was borrowed from the Chinese, used in moderation and with the greatest of care it is the least dangerous but when used extensively and recklessly, as of late years it has made our Fourth of July a national calamity and a national nuisance. Instead of a day of gladness and rejoicing it is a day dreaded by many.

It is not generally realized the great loss of life and property occuring every year caused by fire works. A few years ago two thirds of the City of Portland, Maine, was burned, caused by the careless handling of fire chackers. From the same cause Pittsburg lost $50,000 worth of property in one day and in eight years the fire loss in the United States as result of the careless handling of fire works amounted to over $2,500,000.

Public sentiment today is in favor of a safe and sane Fourth of July. This should be encouraged. Where Fourth of July celebrations have

DORA WAIVES HEARING FOR COURT TRIAL

Furnishes Bond in Sum of $500 for Her Appearance at the Proper Time

Without undergoing the annoyance of a preliminary hearing Dora Gilmore appeared before Justice of the Peace Harry W. Scott, at North Charleroi Monday evening and gave bond in the sum of $500 for her appearance at court. Her hearing on a charge of operating a bawdy house and of disorderly conduct was to have taken place tonight before Justice of the Peace Scott.

The waiving of the hearing by Dora closed for the time being the case. It will come up most likely at the next term of court. District Attorney R. G. Miller is engaging his attenntion on the Gilmore matter and will likely attend to the prosecution. Dora is said to still be in the community. She was at Monessen Sunday it is stated. Her bond has been furnished by M. Hoover, a Maple Creek man.

DEATH OF ROSCOE MAN IS SUDDEN

The funeral of Perry Sneath, one of Roscoe's oldest citizens, was held at that place thi safternoon. Mr. Sneath died Saturday after a short sickness, aged 71 years. He leaves a wife and four child en: Mrs. Joseph Knowles, of Belle Vernon; John Sneith, who is married and lives in Roscoe; Mrs. Mary Jane Miner, of Waynesburg, and Mrs. Elizabeth Ray, who resides near Christopher, Ill. The burial was in Howe's cemetery.

Fights During Excursion

It is reported from Monessen that when the Owls held their excursion on the river Sunday, there were at least two fights, one resulting from a card game. A large quantity of bee was taken along, it is stated and at that the common thirst was not to be gratified. About 1,000 patronized the affair.

WILL OBSERVE FOURTH AT THE PLAYGROUND

Rivalry at Monongahela

Baseball Team of That City and Team of Charleroi Awaiting Last Contest

Toaday the Charleroi Independents play at California against the independent team of that flourishing burg. California has been aching to try out their team against the Charleroites since the season was young, and have failed so far to get in so much as a good lick, owing to tough luck and other things to match.

Much rivalry is being occasioned between the little hamlet down the river on the map as Monongahela and Charleroi, as a result of the series of three games being played. Monongahela took the first one on a Monongahela yard, and Charleroi took the second on the Charleroi grounds The third game and the deciding of all will be played within a week or two and it is believed that it will draw all kinds of a crowd. No one knows yet just where it will be played.

WOMAN, AGED 97 IS DEAD

"Grandmother Savage" Dies at Home of Daughter Here

WAS BORN IN BELGIUM

Mrs. Joachine Waltigny, aged 97 years, who was claimed to be one of the oldest women in Charleroi died at the home of her daughter Mrs. August Savage, at 832 Oakland avenue at 10 o'clock Monday evening. She was better known throughout the community as "Grandmother Savage" and had friends in all parts of the Monongahela valley and other points of Western Pennsylvania.

"Grandmother Savage" was a native of Belgium. She lived there the greater part of her life. In fact it was not until the death of a son with whom she made her home that she came to the United States, at the time being 79 years old. She made the trip abroad alone, and enjoyed it very much. Since then she has lived with her daughter in Charleroi.

Mrs. Waltigny lived an active life and was about to within a few days before her death. A few weeks ago she took a trip to Monessen and visited there over Sunday. Her first illness was noticed on Sunday, and her death came quick from ailments of her advanced age.

Three daughters survive, together

MODERN JUGGERNAUT.

utomobile is proving to be a Juggernaut of modern times, at the car of Juggernaut was to in the early days of fanaticism at country, the auto is to this try, with the difference that the ims are involuntary. instead of ing voluntary. The British government has long since prevented the rifices to the car of the idol Juggaut in India, and it remains for wn state government to prevent voluntary sacrifices of victims e carelessness and recklessnes he drivers of these modern Juggauts, the autos.

A railroad locomotive engineer cant be qualified to drive an engine til he has served a long and care- apprenticeship in mechanics and liminary experience. He must t be familiar with all the duties, ides possess a profound and accue knowledge of an intricate sys- of orders, codes and signals, and st show his proficiency by strict l rigid examinations to be able to prehend and execute these orders tantly and on a moment's notice must be sober and reliable, cool ded, and capable of exercising ext judgment in emergencies. More n that he has a clear track and clusive right of way on which to this engine. That is what the ene drivers of the railroads are red to do to safeguard the propf the company and the traveling Extra precautions are taken besides by both the company and the public to prevent accident from trespassing on the tracks of railroads, which are private property, and because of these precautions many accidents are annually prevented.

Any person, however, who has the means can buy an auto and proceed o run it on the crowded streets and public highways. Comparatively few persons have any previous training, and the average private driver of a car does not have the slightest training in regard to quick action in emergencies, like a railroad engineer, nor a knowledge of applied mechanics. How many people would embark on a pleasure excursion train whose engineer was a green hand, and whose only previous training was oral instructions to pull this lever forward to start the engine, and to push it back in order to stop it? That is the way people run autos on our rowded streets and thoroughfares, and the numerous accidents testify to the foolhardiness of the system.

The time will come when any person driving an auto will have to take a regular course of mechanical instructions and be able to qualify by a rigid and expert examination for the position of driver. It is too dangerous a proposition to continue to permit the present unrestricted system to continue.

A NATIONAL QUESTION.

The failure of the child labor bill to pass at the recent session of the egislature, once again serves to call attention that this should be made a national question. The desperate fight of the manufacturing interests against the eight- our law for child labor was based to a large extent on the argument that so long as other states that came into competition with their manufactures employ children longer than eight hours, it is not fair to impose that regulation on the manufacturers of this state. The argument seems to have been effective, as neither the children nor the women could get an eight-hou day law passed at this session of the legislature.

Although a number of the states have passed laws for an eight hour day for woman and children, the question will be a long drawn out one until the Federal government takes it up. In all sense of justice and equity an eight hour day for factory labor is ample for women and children. Men are able to command it, and there is no reason why it should not apply to women and children. A concentrated fight should be made on congress by the friends of the child labor law from this time hence.

ELECTRIC SPARKS

Not only the evidence of 1,300 witnesses, but the court and the lawyers engaged in the harvester trust investigation seem to be all in.

* * *

Pittsburg may supply free tennis courts for the poor. And New York will manufacture and sell ice at cost to the poor. In this weather we would rather be among the poor in New York.

* * *

Excuse us the relief from the torridity if we are to have frigidity.

PICKED UP IN PASSING

"How can a person keep cool this weather," was the question submitted to W. C. Rucker, assistant surgeon-general of the public health service at Washington, D. C., during the recent heat wave.

Here is the prescription that official recommended:

"First of all, being cool is largely a condition of mind. One who wants to keep cool should make up his mind to be still—in other words, not to produce. Heat is caused by the burning of the human tissues and the tissues are burned by action or movement.

"One should avoid meats in hot weather; should eat cooked vegetables and avoid green fruits, because they upset the digestion and invite intestinal attacks.

"Of course, every human has to produce a certain amount of heat, but there is a science in getting rid of the heat so produced that is little known to the average man.

"Ventilation—of clothing or offices—removes the heat that envelopes the body.

"Another thing—don't eat or drink anything with whose family history you are not acquainted. Patronize only those restaurants of known cleanliness. Opportunities for the spread of disease through water and food are increased enormously during the warm weather.

"Avoid the fly as you would an adder. It is conceived in iniquity, bred in fifth and leads a life of crime.

"Don't get chilled at night. Such a lowering of the bodily temperature as that caused by lying nude on a bed in a breeze often brings on intestinal disorders and summer colds, which often develop into tuberculosis.

"Bathe as often as you want to, but avoid extremes of heat and cold in the water. After the bath dry yourself very slowly and use a good quantity of talcum powder to prevent excoriation of body surfaces that rub together."

MACBETH-EVANS PLANT CLOSED FOR VACATION

The Macbeth-Evans glass plant here is closed for the regular summer vacation, which will be for about ten days. Annually at about this time the plant is shut down. Hasty repairs are always made during the shutdown and generaly they answer the purpose towards keeping the plant in shape until the next shutdown. A tank was compelled through a break to be closed ahead of time this year, and it is now being repaired.

WELL KNOWN MAN DIES AT HOME OF SON

William Finley Smith, aged 75 years, 4 months and 22 days died at 6:45 o'clock Monday evening at the home of his son, Redmond Smith, at Allenport after an illness of about three months from heart trouble. He had been a resident of the Monongahela valley for many years. He came to Allenport from Elizabeth, where he was employed as a ship caulker.

Four sons and one daughter survive. The sons are Redmond, who for the last 14 years has been the superintendent of Dock No. 14 of the Monongahela River Consolidated Coal and Coke company at Allenport, William F. at Point Pleasant, Harry F. at Monongahela and George of Elizabeth. The daughter is Mrs. Thomas Shanabarough of McKeesport.

The funeral will be held at 2 o'clock on Wednesday afternoon with services at the late home conducted by Rev. Newell of the Allenport Methodist Episcopal church. Interment will be in the cemetery at Elizabeth.

Foreigners Fight.

Two foreigners quarreled over a bucket of water at the Plate Glass plant this morning and one so thoroughly lost control of himself as to batter the other over the head with a fork handle. A doctor was called, and the man's wounds were dressed and both were discharged and sent home.

English Boys Trained for Chefs.

With the general complaint of the high cost of living the Universal Cooking and Food exhibition which was recently held in London attracted more than usual attention. Demonstrations were given each day by continental experts in foreign household cooking. The London county council is training a number of English boys just out of school to become chefs and waiters. That the experiment is proving a success was shown by a luncheon, attended by more than 100 guests, which was both cooked and served by boys who are being thus trained. The feature which distinguished the exhibition from all those previously held was the effort to give a practical demonstration of the low cost at which nutritious food, properly prepared, could be placed on the workingman's table. It was shown, for example, that a good soup for fifty people could be obtained for 58 cents, German pie for fifty people for $1.09, and many other nourishing dishes were exhibited which were made from what, in the ordinary household, is thrown away as scraps or waste through ignorance of how it can be utilized.

Mr. Meekton's Mean Idea.

"Why did you insist on having your wife join the Suffragette Club?" "Because," replied Mr. Meekton grimly, "I want to see that Suffragette Club get all the trouble that's coming to it."

WAYS OF FRENCH BEGGARS

Select Their Favorite Prison, Then Commit an Offense to Insure Winter Accommodations.

Beggars and professional vagabonds who have passed thirty years do not fail each year when the winds of October blow to select their winter quarters.

It is then that each of them commits some offense, well knowing that he will get a penalty of six months' imprisonment. The delinquent so times his offense that he will not be at liberty until the month of April, in the first warm breezes of spring. He chooses his winter quarters wisely, for he knows the good and bad prisons.

Fresnes, because of its valued and luxurious accommodations, occupies the first rank among prisons. This year the temperature was such as to bring about some true knavery on the part of these beggars and vagabonds. From the month of August they were forced to commit some offense in order to assure themselves a shelter.

So la Sante, the antechamber of Fresnes, was gorged with prisoners for whom the tardy rays of the September sun proved a cruel irony. If the magistrates show clemency and condemn these derelicts to only six months of prison the disaster of these poor devils will be complete, for they will, without pity, be thrown into the street in the open month of January.—le Ori de Paris.

ARE HANDSOMEST IN WORLD

Royal Irish Constabulary Bear Off the Palm From All Police of the Earth.

According to those most entitled to speak on the comparative pulchride of the police, the Royal Irish Constabulary bear off the palm from all policemen in all other parts of the world. Dean Hole is quoted in the London Chronicle as contributing the following tribute to the fascinations of the noble Irish force:

"Our London police are well favored in appearance, but if the Royal Irish Constabulary were to take their place for a week there wouldn't be a single female servant to be warranted heart whole in the metropolis."

London goes to the rural districts for its policemen largely, and the result is often as amusing, not to say exasperating, as that which arises in New York from the employment of foreign car conductors, sublimely ignorant of city streets and neighborhoods. The Chronicle writer tells of on encounter with an inexperienced policeman who was asked the whereabouts of a famous firm in the neighborhood, to which query the new bob by replied gayly:

"Blees ye, I know no more than yourself, sir. I only came up from Dorset yesterday."

Tea Drinking a Vice?

A foreign critic says: "In hunting a cause for this apparent decadence of the once mighty people (the British), some scientists have had much to say on the subject of tea drinking, for nowhere else is the habit so universal as in the British Isles. Women and children drink tea off and on during the day. Business men have to stop their work at intervals to partake of their tea. And in most instances the brew is exceptionally strong. It has been estimated that each person in Great Britain, on an average, takes a daily dose of 3.6 grains of alkaloid and 9.7 grains of tannin consumed in tea. This means that the average tea drinker takes half as much alkaloid and nearly as much tannin as the Maximum allowed by the British pharmacopoeia for an occasional dose. And, of course, many thousands of people drink a great deal more than the average dose."

Speed of a Bullet.

Experiments with improved instruments for measuring the velocity of projectiles have shown that the speed goes on increasing after the missile has left the mouth of the cannon. Leaving the muzzle with a velocity of 1,474 feet a second, a projectile has been observed to increase its speed to 1,689 feet a second within the first six feet. It is only after having traveled 25 yards that the projectile's velocity becomes reduced to the speed it has on leaving the muzzle. This is ascribed to the impulse of the expanding gas being felt for some distance beyond the cannon's mouth.

Cheek.

"Cheek" in the sense of impudence is an old term. The earliest quotation in Sir James Murray's dictionary is from Captain Marryat (1840). But it has lately been found in the sixteenth century records of Galway, in the west of Ireland. The municipal rulers of that fighting city—the "man from Galway" has become proverbial for pluck and readiness to defend the hottest of corners—decreed that any person giving "cheek" to the mayor should "forfeit 100 shillings and have his body put into prison."

Varying Melting Points.

The melting points of various heat-resisting materials have been thus determined by the United States bureau of standards: Fireclay brick, 3,031 to 3,137 degrees Fahrenheit; bauxite brick, 3,841 to 3,245 degrees; chromite brick, 3,772 degrees; magnesia brick, 3,919 degrees; bauxite, 3,308 degrees; chromite, 3,966 degrees; pure alumina, 3,650 degrees; pure silica, 3,182 degrees; silicon carbide, beginning to decompose at 4,028 degrees, but does not melt below 4,792 degrees.

Rabbits Cause Immense Loss.

Observant and experienced men compute that eight or ten rabbits eat or destroy as much grass as one sheep. As there as so many millions of rabbits in Australia, the loss in the carrying capacity of the country is appalling. The pest in New South Wales is spreading, notwithstanding all that is being done in the shape of trapping, poisoning, fumigating, and digging out.

Pretty Girls and Plain Men.

When a pretty woman marries a plain man it is not because she pities him. A woman loves a man because of his strength. His determination appeals to her, and wins her in the end, though she may not have been attracted to him in the beginning. Firmness compels a woman's admiration and respect, and that is the first stepping stone to love.

Child-Training.

It is not fair to a small child for the parents or nurse to be careless about the little things that develop thoughtfulness, self-reliance and self-control in a child. Self-control is a characteristic absolutely essential to manhood or womanhood, and it is not learned in a day. It is the result of patient teaching and training through all the long years of babyhood and childhood.

Thought His Duty Ended.

The Duc de Raguse once explained to the Countess de Boigne the nature of his connection with the emperor as follows: "When the emperor said, 'All for France,' I served with enthusiasm; when he said, 'France and I,' I served with obedience; but when he said, 'I' without France, I felt the necessity of separating from him."

Didn't Appreciate Whitman.

Shortly after Walt Whitman's "Leaves of Grass" made its appearance, J. T. Trowbridge was walking with Lowell in Cambridge, when the latter pointed out a door-way sign, "Groceries," with the letters set zigzag, to produce a bizarre effect. "That," said he, "is Walt Whitman—with very common goods inside."

Yield of a Grain of Wheat.

Very few people have an idea of the bounty of nature. A scientist of Cambridge, Eng., recently made an instructive experiment which showed that a single grain of wheat sown in June, produced 47 pounds 7 ounces. One acre of fairly good land will produce 30 bushels of wheat or 1,260 pounds of flour.

Nicaraguan "Capote."

Instead of raincoats, the Nicaraguan wears a "capote," which is a piece of impervious material almost square, with a hole in the center large enough for the wearer to put his head through. It is made by pouring rubber over unbleached muslin.

Always There.

A New York theatrical man is advertising for the most beautiful woman in the world, as if every musical show press agent didn't claim that she was in the front row of the chorus.—Detroit Free Pres.

Motor Car Jumps Three Feet.

A motor car with six occupants dashed up to a drawbridge at Haddiscoe, Norfolk, just as it was being closed, and safely leaped across a space of three feet between the two leaves.—London Mail.

Proof to the Contrary.

"I understand that a number of women have learned to smoke cigars," said the frivolous observer. "I don't believe it," replied Mr. Meekton. "The kind of cigars women buy nobody could smoke."

To Remove Varnish.

Three tablespoonfuls of baking soda in a quart of water, applied with a rough cloth, will remove the old varnish very easily when you wish to revarnish furniture.—Woman's Home Companion.

Whale Cast on Coast.

A whale, weighing five tons, was buried recently on the Berkwickshire (Scotland) coast. The monster had evidently been run down by a steamer, and was cast up by the tide.

Book Annoyed Him.

"Oh, please do away with that book!" was the remark of a man to the bench, when the conviction book was produced to show that it was his fifty-sixth appearance in court.

Off the Wire.

Operator—"Number, please?" Subscriber—"I was talking mit my husband und now I don't hear him any more. You must of pushed him off de vire."—Milwaukee News.

Shallow of Intellect.

Some men are very interesting for a first interview, but after that they are exhausted and run out.—Charles Caleb Colton.

Preserving Carpenters' Tools.

To keep tools from rusting, place a sponge moistened with coal oil in the tool chest.

Man of No Force.

He makes no friend who never made a foe.—Tennyson.

TRAINED IN HOUSEHOLD WORK

German Institution Teaches Girls Domestic Service, and Finds Great Demand for Graduates.

Berlin has an institution, founded about two years ago by a woman. The object of the "Sister School," as it is called, is to train well-educated girls for domestic service. The students are generally daughters of professional men, and the curriculum comprises cookery, housework, the care of children, and needlework. When application is made for the services of a "sister," the matron, or some other woman connected with the school, calls upon the applicant, forms an opinion of the "situation," and arranges terms. Each "sister" must be allowed a free afternoon every week, one Sunday every other week from four o'clock, and a fortnight's holiday in the year. Six weeks' notice is required on each part. The salaries paid range from $7.50 to $12.50 a month, with, of course, board and lodging. Sisters wear a brown uniform, are treated as social equals, are not required to take meals with other servants, and are addressed as "Sister Marie," "Sister Hedwig," etc. The demand for their services is so great that the head of the Sister school declares that she could place 500 girls a year, instead of 50, and similar institutions are about to be established in other German towns.

MAKE WAREHOUSE OF CHURCH

Sacred Edifice at Brighton, England, Has Been Unfortunate Since Its Erection.

To serve as a cold storage warehouse for meat and eggs—such is the fate of the beautiful Church of the Resurrection at Brighton, England. Built at the expense of the late Rev. H. D. Wagner for the accommodation, it is said, of the poorer members of the congregation, and for those who preferred a ritual simpler than that of St. Paul's church on West street, this building first attracted the public attention as the subject of a curious lawsuit. Mr. Wagner planned to build a remarkably tall church, and the owners of the adjoining property, by means of a lawsuit, prevented him from so doing. Accordingly he caused deep excavations to be made, and thus secured the desired internal height. The Church of the Resurrection proved to be a great expense and was closed in 1908, being, in the opinion of the present vicar of St. Paul's, no longer necessary for the purpose for which it was built. In 1909, after prolonged opposition on the part of Rev. E. F. B. Weber, one of the trustees, it was sold. Since then it has stood empty and in disrepair, until the grotesque tragedy of its present usage occurred.—The Churchman.

Tons of Iron Lost in Rust.

One large railroad system suffers a loss of more than eighteen tons of metal daily, due solely to the effect of rust. Thus far the only known preventive is to keep the metal surface always covered with a suitable paint. Some idea of the costliness of this remedy, however, may be gained from the fact that it requires about $10,000 annually to paint one large railway bridge alone. A typical case of this kind is the Brooklyn bridge, upon which a corps of painters are constantly employed, as the weather makes repainting of one end of this large structure necessary before the workers have reached the other. Although experiments have demonstrated that pure iron surrounded by oxygen does not rust, and that some acid, especialy carbonic acid, is necessary for the production of rust, the secret of manufacturing rustless steel and iran remains to be discovered.

Lasting Joke.

How long will a good joke last? Who can tell? You have heard that one about the good sleighing in Canada, and how by putting on a pair of pajamas and sitting on a cake of ice before an open window and ringing a bell one can get the same effect, and much cheaper. Billy Emerson, the minstrel, originated that one over thirty-five years ago, and it is one that has never run down. DeWolf Hopper began to use it in his curtain speeches eleven years ago, and ever since, eight times a week forty weeks a season, he has used it and it has never failed to get a laugh. Always there are some in the audience who never heard it. Hopper figures that with the addition of a few score times at private functions he has "sprung" the chestnut 3,753 times. It is his one best bet, he says, and expects to use it as long as he is in public life.

$20 Gold Pieces a Quarter Each.

When five boys commenced to sell $10 and $20 gold pieces on the streets of North Scranton for 25 cents each, with the supply apparently unlimited, curiosity was at once aroused as to the source of supply, and the boys were taken into custody and given the "third degree." When searched the youths' pockets produced over $500 in gold coin and when questioned they admitted that they had found a "pot of gold."

The money was buried in a box in the cellar of a house formerly occupied by Peter J. Scanlon, who during his lifetime had the reputation of being a miser. There were $620 in shiny gold pieces in the box. The boys, none of whom was over eight years of age, thought they were brass medals and sold about twenty of them before being arrested.—Scranton (Pa.) Dispatch to Philadelphia Record.

A. H. FURLONG

TO THE PUBLIC:

You can't get the love of your old work out of your system, no matter how hard you may try. I didn't try very hard, but yielded easily and here I am.

I represent some of the leading piano manufacturers in the country and am ready to sell you the best at lowest possible prices---on your own terms.

Do you want a piano, or player piano, a square piano or an organ; or a good second hand piano? Come to me. I know how to make it easy for you to buy just what you want. I'll guarantee to both please you and save you money.

FIRE MARSHAL GIVES ADVICE

(Continued from First Page)

been tried without the promiscuous use of fire works it has been found most satisfactory as no accidents from gun powder occurred and no fires from explosion reported.

There are in all communities persons disposed to obstinacy and unreasonably persist in doing things contrary to the wishes of the majority. Such persons often cause trouble and may do so on the Fourth of July by the careless handling of fire works, which may result in injury or death of loved ones or the destruction of property.

Householders should be on guard against such persons, by being prepared for emergencies. Keep buckets filled with water and place them handy for immediate use. Members of fire departments should be interested and lend aid for a safe and sane Fourth of July. Usually this is one of the busiest days of the year and is seldom passed without injury or death occurring to some member. Be safe. Be sane, and advise and help others to be. Remember that merriment is better than mourning.

Remember that it is better to plan for the saving of life and property before loss occurs than afterwards.

Joseph L. Baldwin,
State Fire Marshal.

THIS WOMAN HAD MUCH PAIN WHEN STANDING

Tells How Lydia E. Pinkham's Vegetable Compound made Her a Well Woman.

Chippewa Falls, Wis.—"I have always had great confidence in Lydia E. Pinkham's Vegetable Compound as I found it very good for organic troubles and recommend it highly. I had displacement, backache and pains when standing on my feet for any length of time, when I began to take the medicine, but I am in fine health now. If I ever have those troubles again I will take Lydia E. Pinkham's Vegetable Compound." — Mrs. ED. FERRON, 816 High St., Chippewa Falls, Wisconsin.

Providence, R. I.—"I cannot speak too highly of Lydia E. Pinkham's Vegetable Compound as it has done wonders for me and I would not be without it. I had organic displacement and bearing down pains and backache and was thoroughly run down when I took Lydia E. Pinkham's Vegetable Compound. It helped me and I am in the best of health at present. I work in a factory all day long besides doing my housework so you can see what it has done for me. I give you permission to publish my name and I speak of your Vegetable Compound to many of my friends." — Mrs. ABRIL LAWSON, 126 Lippitt St., Providence, R. I.

L. XIII. NO. 290 | CHARLEROI, WASHINGTON CO., PA., TUESDAY, JULY 1, 1913 | ONE C

RL IS RUN DOWN BY AUTO; MAY DIE

ght-Year Old Daughter of M. and Mrs. L. F.Hardesty is Victim

URELY AN ACCIDENT

Carl Bumbaugh, of Monessen Was Driving Machine at Slow Speed

As the result of being run down by an automobile, Dorsie Hardesty,aged 8 years, the daughter of Mr. and Mrs. L. F. Hardesty, of 739 McKean avenue is in the Monessen-Charleroi hospital in a critical condition. According to the attending physicians she suffered a fractured skull in the accident. The automobile which struck the little girl was one owned by W. S. Bumbaugh, of Monesen,and was driven by his son Carl Bumbaugh. The young man gave bond in the sum of $500 before Justice of the Peace Harry W. Scott, at North Charleroi, for his appearance.

The little girl was playing with others about McKean avenue and Eighth street, the story is told, her father and mother being away from the house for a short time. She was on the east side of the street. The automobile approached from Seventh street, running witnesses state at a slow rate of speed. The horn was tooted.

Just as the car approached Eighth street the girl is said to have darted across the street. She was struck and thrown aside. She lit at the curb unconscious, and was carried into a nearby store. Doctors were summoned by the auto driver, and after every possible attention was given the child, she was rushed to the hospital in the machine which struck her. It is believed that her head was struck at the base of her skull by a spring of the machine.

The girl had not regained consciousness at noon today and was being closely watched. No complications had developed at that time, and it is hoped that none wil ldevelop.

TWENTY-TWO DEATHS ARE INVESTIGATED

Twenty-two violent deaths occurred in Washington county during the month of June. The mines claimed the largest number of victims. Coroner James Heffran who investigated all of the deaths has the following report for the month:

Railroads	
Trespassing, male	1
Train jumping, boy	1
Suicide	
Shooting	1
Cutting throat	1
Drownings	
Intoxicated, adult	1
Bathing, adult	1
Bathing, boys	3
Mines	
Electrocutions	3
Motor collision	1
Crushed by wagons	2
Falls of slate	2
Other Causes	
Found dead on street railway	1
Natural gas explosion, mine	1
Struck by automobile, child	1
Concealment of birth	1
Kicked by horse	1

Editor Only an Amateur

When it Comes to Cussing, They Say, Watch Out for Donora Folks

If reports are true Donora has a school board that has congressional committees and legislative committees squeezed out of the handbook when it comes to real thrilling goings-on. According to stories published in the American the school board goes into executive session whenever things seem to be getting warm, and that is about every meeting. Some of the members are expert cussing men, in fact to hear one or two of them according to reports, one would think they were ox drivers, so proficient and picturesques in their vocabulary are they. They go into executive session and then it is stated nobody interferes with their "personal liberty." The press representative is not permitted, of course to attend the star chamber sessions, for the reason that the editor of the American who though a newspaper man beside the school board members is a rank amateur at cussin' and might through jealously print the proceedings.

LAW TO BE ENFORCED RIGIDLY

Burgess Risbeck Makes Proclamation for the Fourth

CARE MUST BE TAKEN

Burgess George W. Risbeck today issued his proclamation governing Fourth of July celebration. It follows:

"In view of the dangers attending the sale and use of explosion, I hereby call atention of the public and dealers to the following State law, which will be rigidly enforced by the police of Charleroi on the Fourth:

"It shall be unlawful for any person to set off, fire or make use of for the purpose of explosion, any firecrackers over six inches in length and any firecracker over three and one-half inches to six inches in length, over three-quarters of an inch in diameter and any firecracker to the length of three and one-half inches over one inch in diameter, or to set off fire or explode in any county in the Commonwealth any fire-cracker or fireworks containing picric acid or picrates, dynamite or other high explosive compounds; or to explode any blank cartridge, pellet or tablet, containing dynamite or other high explosive compound, when used in pistols, hollow canes or any toy for explosive purposes."

(Continued on fourth page)

OPERATIONS CARRIED ON BY PICKPOCKETS

Heavy Losses Reported Because of Their Recent Activity--Sunday Seems to be Their Best Day

Pickpockets are making merry at the expense of people of Charleroi and surrounding towns. They are mostly operating on trolley cars, it is stated and Sunday seems to be a good day.

On last Sunday a haul of an aggregate sum of $241 was secured it is stated by pickpockets from their operations on the Pittsburg and Charleroi car line. "Jack" Horner of Monessen, a bartender at the Westmoreland hotel, at that place was one to suffer. He lost $9", which was removed from his hip pocket. He thinks the work was done while a crowd was getting off a car at the Monessen-Charleroi bridge. He went to the car barn to report his loss and while he was there two foreigners came in to report losses. One complained that $10 was taken from his pocket and the other said he had lost $112.

Other losses have been reported within the last few weeks. It is stated the pickpockets frequent the cars because of the crowds that ride them. The Pittsburg Railways company are unable to locate any clews as to the pickpockets, who seem to be professionals. One method they use is to slash pockets Two work together, one jostling the victim while the other secures his roll of money

FIRE MARSHAL GIVES ADVICE FOR FOURTH

Says Every Precaution is Necessary to Prevent Disastrous Fires

Joseph L. Baldwin, state fire marshal, has issued a bulletin warning the public against fire losses on the Fourth andurging a safe and sane observance, as well as extra precautions on the part of all property holders and fire departments. State Marshal Baldwin says:

The Fourth of July, which is and should be a day of Patriotic rejoicing, has become a day of apprehension and terror to all persons who have any concern for the safety of life and property. It is a day when fire departments in all cities and towns are generally kept on the run. The people have not yet learned the significance of the day in its highest and best sense. They have not yet learned that noise is not patriotism.

Other countries show their patriotism in a more quiet manner with considerably less loss of life and property, and this country in the earlier days celebrated the Fourth of July by the unfurling of the Stars and Stripes, a salute of guns, ringing of church bells and patriotic songs and speeches. The fire cracker was borrowed from the Chinese, used in moderation and with the greatest of care it is the least dangerous but when used extensively and recklessly, as of late years it has made our Fourth of July a national calamity and a national nuisance. Instead of a day of gladness and rejoicing it is a day dreaded by many.

It is not generally realized the great loss of life and property occuring every year caused by fire works. A few years ago two thirds of the City of Portland, Maine, was burned, caused by the careless handling of fire chackers. From the same cause Pittsburg lost $50,000 worth of property in one day and in eight years the fire loss in the United States as result of the careless handling of fire works amounted to over $2,500,000.

Public sentiment today is in favor of a safe and sane Fourth of July. This should be encouraged. Where Fourth of July celebrations have

DORA WAIVES HEARING FOR COURT TRIAL

Furnishes Bond in Sum of $500 for Her Appearance at the Proper Time

Without undergoing the annoyance of a preliminary hearing Dora Gilmore appeared before Justice of the Peace Harry W. Scott, at North Charleroi Monday evening and gave bond in the sum of $500 for her appearance at court. Her hearing on a charge of operating a bawdy house and of disorderly conduct was to have taken place tonight before Justice of the Peace Scott.

The waiving of the hearing by Dora closed for the time being the case. It will come up most likely at the next term of court. District Attorney R. G. Miller is engaging his attenntion on the Gilmore matter and will likely attend to the prosecution. Dora is said to still be in the community. She was at Monessen Sunday it is stated. Her bond has been furnished by M. Hoover, a Maple Creek man.

DEATH OF ROSCOE MAN IS SUDDEN

The funeral of Perry Sneath, one of Roscoe's oldest citizens, was held at that place thi safternoon. Mr. Sneath died Saturday after a short sickness, aged 71 years. He leaves a wife and four children: Mrs. Joseph Knowles, of Belle Vernon; John Sneith, who is married and lives in Roscoe; Mrs. Mary Jane Miner, of Waynesburg, and Mrs. Elizabeth Ray, who resides near Christopher, Ill. The burial was in Howe's cemetery.

Fights During Excursion

It is reported from Monessen that when the Owls held their excursion on the river Sunday, there were at least two fights, one resulting from a card game. A large quantity of beer was taken along, it is stated and at that the common thirst was not to be gratified. About 1,000 patronized the affair.

WILL OBSERVE FOURTH AT THE PLAYGROUN

Rivalry at Monongahela

Baseball Team of That City and Team of Charleroi Awaiting Last Contest

Toaday the Charleroi Independents play at California against the independent team of that flourishing burg. California has been aching to try out their team against the Charleroites since the season was young, and have failed so far to get in so much as a good lick, owing to tough luck and other things to match.

Much rivalry is being occasioned between the little hamlet down the river on the map as Monongahela and Charleroi, as a result of the series of three games being played. Monongahela took the first one on a Monongahela yard, and Charleroi took the second on the Charleroi grounds The third game and the deciding of all will be played within a week or two and it is believed that it will draw all kinds of a crowd. No one knows yet just where it will be played.

WOMAN, AGED 97 IS DEAD

"Grandmother Savage" Dies at Home of Daughter Here

WAS BORN IN BELGIUM

Mrs. Joachire Waltigny, aged 97 years, who was claimed to be one of the oldest women in Charleroi died at the home of her daughter Mrs. August Savage, at 832 Oakland avenue at 10 o'clock Monday evening. She was better known throughout the community as "Grandmother Savage" and had friends in all parts of the Monongahela valley and other points of Western Pennsylvania.

"Grandmother Savage" was a native of Belgium. She lived there the greater part of her life. In fact it was not until the death of a son with whom she made her home that she came to the United States, at the time being 79 years old. She made the trip abroad alone, and enjoyed it very much. Since then she has lived with her daughter in Charleroi.

Mrs. Waltigny lived an active life and was about to within a few days before her death. A few weeks ago she took a trip to Monessen and visited there over Sunday. Her first illness was noticed on Sunday, and her death came quick from ailments of her advanced age.

Three daughters survive, together

l on a moment's notice
sober and reliable, cool
capable of exercising ex-
nt in emergencies. More
has a clear track and
ght of way on which to
e. That is what the of-
of the railroads are re-
to safeguard the prop-
ompany and the traveling
ta precautions are taken
besides by both the company and the public to prevent accident from trespassing on the tracks of railroads, which are private property, and because of these precautions many accidents are annually prevented.

Any person, however, who has the means can buy an auto and proceed to run it on the crowded streets and public highways. Comparatively few persons have any previous training, and the average private driver of a car does not have the slightest training in regard to quick action in emergencies, like a railroad engineer, nor a knowledge of applied mechanics. How many people would embark on a pleasure excursion train whose engineer was a green hand, and whose only previous training was oral instructions to pull this lever forward to start the engine, and to push it back in order to stop it? That is the way people run autos on our crowded streets and thoroughfares, and the numerous accidents testify to the foolhardiness of the system.

The time will come when any person driving an auto will have to take a regular course of mechanical instructions and be able to qualify by a rigid and expert examination for the position of driver. It is too dangerous a proposition to continue to permit the present unrestricted system to continue.

A NATIONAL QUESTION.

The failure of the child labor bill to pass at the recent session of the legislature, once again serves to call attention that this should be made a national question The desperate fight of the manufacturing interests against the eight-hour law for child labor was based to a large extent on the argument that so long as other states that came into competition with their manufactures employ children longer than eight hours, it is not fair to impose that regulation on the manufacturers of this state. The argument seems to have been effective, as neither the children nor the women could get an eight-hour day law passed at this session of the legislature.

Although a number of the states have passed laws for an eight hour day for woman and children, the question will be a long drawn out one until the Federal government takes it up In all sense of justice and equity an eight hour day for factory labor is ample for women and children. Men are able to command it, and there is no reason why it should not apply to women and children A concentrated fight should be made on congress by the friends of the child labor law from this time hence.

ELECTRIC SPARKS

Not only the evidence of 1,300 witnesses, but the court and the lawyers engaged in the harvester trust investigation seem to be all in.

* * *

Pittsburg may supply free tennis courts for the poor. And New York will manufacture and sell ice at cost to the poor In this weather we would rather be among the poor in New York.

* * *

Excuse us the relief from the torridity if we are to have frigidity.

PICKED UP IN PASSING

"How can a person keep cool this weather," was the question submitted to W. C. Rucker, assistant surgeon-general of the public health service at Washington, D. C., during the recent heat wave.

Here is the prescription that official recommended:

"First of all, being cool is largely a condition of mind. One who wants to keep cool should make up his mind to be still—in other words, not to produce. Heat is caused by the burning of the human tissues and the tissues are burned by action or movement.

"One should avoid meats in hot weather; should eat cooked vegetables and avoid green fruits, because they upset the digestion and invite intestinal attacks.

"Of course, every human has to produce a certain amount of heat, but there is a science in getting rid of the heat so produced that is little known to the average man.

"Ventilation—of clothing or offices—removes the heat that envelopes the body.

"Another thing—don't eat or drink anything with whose family history you are not acquainted. Patronize only those restaurants of known cleanliness. Opportunities for the spread of disease through water and food are increased enormously during the warm weather.

"Avoid the fly as you would an adder. It is conceived in iniquity, bred in fifth and leads a life of crime.

"Don't get chilled at night. Such a lowering of the bodily temperature as that caused by lying nude on a bed in a breeze often brings on intestinal disorders and summer colds, which often develop into tuberculosis.

"Bathe as often as you want to, but avoid extremes of heat and cold in the water. After the bath dry yourself very slowly and use a good quantity of talcum powder to prevent excoriation of body surfaces that rub together"

MACBETH-EVANS PLANT CLOSED FOR VACATION

The Macbeth-Evans glass plant here is closed for the regular summer vacation, which will be for about ten days. Annually at about this time the plant is shut down. Hasty repairs are always made during the shutdown and generaly they answer the purpose towards keeping the plant in shape until the next shutdown A tank was compelled through a break to be closed ahead of time this year, and it is now being repaired.

A writer says the Germans are looking for a sure thing. That indicates they have been hunting verbs in German literature without satisfying success.

* * *

When a man is bidden Godsped in going away for a year, what is meant anyhow. Is it that they hope he will die and be rushed into heaven or is it that they hope he will reach his destination quick and find out he wants to stay there for all time.

WELL KNOWN MAN DIES AT HOME OF SON

William Finley Smith, aged 75 years, 4 months and 22 days died at 6:45 o'clock Monday evening at the home of his son, Redmond Smith, at Allenport after an illness of about three months from heart trouble. He had been a resident of the Monongahela valley for many years. He came to Allenport from Elizabeth, where he was employed as a ship caulker.

Four sons and one daughter survive. The sons are Redmond, who for the last 14 years has been the superintendent of Dock No. 14 of the Monongahela River Consolidated Coal and Coke company at Allenport, William F. at Point Pleasant, Harry F. at Monongahela and George of Elizabeth. The daughter is Mrs. Thomas Shanabarough of McKeesport.

The funeral will be held at 2 o'clock on Wednesday afternoon with services at the late home conducted by Rev. Newell of the Allenport Methodist Episcopal church. Interment will be in the cemetery at Elizabeth.

Foreigners Fight.

Two foreigners quareled over a bucket of water at the Plate Glass plant this morning and one so thoroughly lost control of himself as to batter the other over the head with a fork handle. A doctor was called, and the man's wounds were dressed and both were discharged and sent home

English Boys Trained for Chefs.

With the general complaint of the high cost of living the Universal Cooking and Food exhibition which was recently held in London attracted more than usual attention. Demonstrations were given each day by continental experts in foreign household cooking. The London county council is training a number of English boys just out of school to become chefs and waiters. That the experiment is proving a success was shown by a luncheon, attended by more than 100 guests, which was both cooked and served by boys who are being thus trained. The feature which distinguished the exhibition from all those previously held was the effort to give a practical demonstration of the low cost at which nutritious food, properly prepared, could be placed on the workingman's table. It was shown, for example, that a good soup for fifty people could be obtained for 58 cents, German pie for fifty people for $1.09, and many other nourishing dishes were exhibited which were made from what, in the ordinary household, is thrown away as scraps or waste through ignorance of how it can be utilized.

Mr. Meekton's Mean Idea.

"Why did you insist on having your wife join the Suffragette Club?" "Because," replied Mr. Meekton grimly, "I want to see that Suffragette Club get all the trouble that's coming to it."

WAYS OF FRENCH BEGGARS

Select Their Favorite Prison, Then Commit an Offense to Insure Winter Accommodations.

Beggars and professional vagabonds who have passed thirty years do not fail each year when the winds of October blow to select their winter quarters.

It is then that each of them commits some offense, well knowing that he will get a penalty of six months' imprisonment. The delinquent so times his offense that he will not be at liberty until the month of April, in the first warm breezes of spring. He chooses his winter quarters wisely, for he knows the good and bad prisons.

Fresnes, because of its valued and luxurious accommodations, occupies the first rank among prisons. This year the temperature was such as to bring about some true knavery on the part of these beggars and vagabonds. From the month of August they were forced to commit some offense in order to assure themselves a shelter.

So la Santé, the antechamber of Fresnes, was gorged with prisoners for whom the tardy rays of the September sun proved a cruel irony. If the magistrates show clemency and condemn these derelicts to only six months of prison the disaster of these poor devils will be complete, for they will, without pity, be thrown into the street in the open month of January.—le Ori de Paris.

ARE HANDSOMEST IN WORLD

Royal Irish Constabulary Bear Off the Palm From All Police of the Earth.

According to those most entitled to speak on the comparative pulchride of the police, the Royal Irish constabulary bear off the palm from all policemen in all other parts of the world. Dean Hole is quoted in the London Chronicle as contributing the following tribute to the fascinations of the noble Irish force:

"Our London police are well favored in appearance, but if the Royal Irish Constabulary were to take their place for a week there wouldn't be a single female servant to be warranted heart whole in the metropolis."

London goes to the rural districts for its policemen largely, and the result is often as amusing, not to say exasperating, as that which arises in New York from the employment of foreign car conductors, sublimely ignorant of city streets and neighborhoods. The Chronicle writer tells of an encounter with an inexperienced policeman who was asked the whereabouts of a famous firm in the neighborhood, to which query the new bobby replied gayly:

"Bless ye, I know no more than yourself, sir. I only came up from Dorset yesterday."

Tea Drinking a Vice?

A foreign critic says: "In hunting a cause for this apparent decadence of the once mighty people (the British), some scientists have had much to say on the subject of tea drinking, for nowhere else is the habit so universal as in the British Isles. Women and children drink tea off and on during the day. Business men have to stop their work at intervals to partake of their tea. And in most instances the brew is exceptionally strong. It has been estimated that each person in Great Britain, on an average, takes a daily dose of 3.6 grains of alkaloid and 9.7 grains of tannin consumed in tea. This means that the average tea drinker takes half as much alkaloid and nearly as much tannin as the Maximum allowed by the British pharmacopoeia for an occasional dose. And, of course, many thousands of people drink a great deal more than the average dose."

Speed of a Bullet.

Experiments with improved instruments for measuring the velocity of projectiles have shown that the speed goes on increasing after the missile has left the mouth of the cannon. Leaving the muzzle with a velocity of 1,474 feet a second, a projectile has been observed to increase its speed to 1,689 feet a second within the first six feet. It is only after having traveled 25 yards that the projectile's velocity becomes reduced to the speed it has on leaving the muzzle. This is ascribed to the impulse of the expanding gas being felt for some distance beyond the cannon's mouth.

Cheek.

"Cheek" in the sense of impudence is an old term. The earliest quotation in Sir James Murray's dictionary is from Captain Marryat (1840). But it has lately been found in the sixteenth century records of Galway, in the west of Ireland. The municipal rulers of that fighting city—the "men from Galway" has become proverbial for pluck and readiness to defend the hottest of corners—decreed that any person giving "cheek" to the mayor should "forfeit 100 shillings and have his body put into prison."

Varying Melting Points.

The melting points of various heat-resisting materials have been thus determined at the United States bureau of standards: Fireclay brick, 3,137 to 3,137 degrees Fahrenheit; bauxite brick, 3,641 to 3,645 degrees; chromite brick, 3,772 degrees; magnesia brick, 3,929 degrees; bauxite, 3,992 degrees; chromite, 3,992 degrees; pure alumina, 3,999 degrees; pure silica, 3,182 degrees; silicon carbide, beginning to decompose at 4,032 degrees, but does not melt below 4,892 degrees.

Rabbits Cause Immense Loss.

Observant and experienced men compute that eight or ten rabbits eat or destroy as much grass as one sheep. As there as so many millions of rabbits in Australia, the loss in the carrying capacity of the country is appalling. The best in New South Wales is spreading, notwithstanding all that is being done in the shape of trapping, poisoning, fumigating, and ligging out.

Pretty Girls and Plain Men.

When a pretty woman marries a plain man it is not because she pities him. A woman loves a man because of his strength. His determination appeals to her, and wins her in the end, though she may not have been attracted to him in the beginning. Firmness compels a woman's admiration and respect, and that is the first stepping stone to love.

Child-Training.

It is not fair to a small child for the parents or nurse to be careless about the little things that develop thoughtfulness, self-reliance and self-control in a child. Self-control is a characteristic absolutely essential to manhood or womanhood, and it is not learned in a day. It is the result of patient teaching and training through all the long years of babyhood and childhood.

Thought His Duty Ended.

The Duc de Raguse once explained to the Countess de Boigne the nature of his connection with the emperor as follows: "When the emperor said, 'All for France,' I served with enthusiasm; when he said, 'France and I,' I served with obedience; but when he said, 'I' without France, I felt the necessity of separating from him."

Didn't Appreciate Whitman.

Shortly after Walt Whitman's "Leaves of Grass" made its appearance, J. T. Trowbridge was walking with Lowell in Cambridge, when the latter pointed out a door-way sign, "Groceries," with the letters set zigzag, to produce a bizarre effect. "That," said he, "is Walt Whitman—with very common goods inside."

Yield of a Grain of Wheat.

Very few people have an idea of the bounty of nature. A scientist of Cambridge, Eng., recently made an instructive experiment which showed that a single grain of wheat sown in June, produced 47 pounds 7 ounces. One acre of fairly good land will produce 30 bushels of wheat or 1,260 pounds of flour.

Nicaraguan "Capote."

Instead of raincoats, the Nicaraguan wears a "capote," which is a piece of impervious material almost square, with a hole in the center large enough for the wearer to put his head through. It is made by pouring rubber over unbleached muslin.

Always There.

A New York theatrical man is advertising for the most beautiful woman in the world, as if every musical show press agent didn't claim that she was in the front row of the chorus.—Detroit Free Pres.

Motor Car Jumps Three Feet.

A motor car with six occupants dashed up to a drawbridge at Haddiscoe, Norfolk, just as it was being closed, and safely leaped across a space of three feet between the two leaves.—London Mail.

Proof to the Contrary.

"I understand that a number of women have learned to smoke cigars," said the frivolous observer. "I don't believe it," replied Mr. Meekton. "The kind of cigars women buy nobody could smoke."

To Remove Varnish.

Three tablespoonfuls of baking soda in a quart of water, applied with a rough cloth, will remove the old varnish very easily when you wish to revarnish furniture.—Woman's Home Companion.

Whale Cast on Coast.

A whale, weighing five tons, was buried recently on the Berkwickshire (Scotland) coast. The monster had evidently been run down by a steamer, and was cast up by the tide.

Book Annoyed Him.

"Oh, please do away with that book!" was the remark of a man to the bench, when the conviction book was produced to show that it was his fifty-sixth appearance in court.

Off the Wire.

To keep tools from rusting, place a sponge saturated with coal oil in the tool chest.

Man of No Force.

He makes no friend who never made a foe.—Tennyson.

TRAINED IN HOUSEHOLD WORK

German Institution Teaches Girls Domestic Service, and Finds Great Demand for Graduates.

Berlin has an institution, founded [illegible] ago by a woman. The object of the "Sister School," as it is called, is to train well-educated girls for domestic service. The students are generally daughters of professional men, and the curriculum comprises cookery, housework, the care of children, and needlework. When application is made for the services of a "sister," the matron, or some other woman connected with the school, calls upon the applicant, forms an opinion of the "situation," and arranges terms. Each "sister" must be allowed a free afternoon every week, one Sunday every other week from four o'clock, and a fortnight's holiday in the year. Six weeks' notice is required on each part. The salaries paid range from $7.50 to $12.50 a month, with, of course, board and lodging. Sisters wear a brown uniform, are treated as social equals, are not required to take meals with other servants, and are addressed as "Sister Marie," "Sister Hedwig," etc. The demand for their services is so great that the head of the Sister school declares that she could place 500 girls a year, instead of 50, and similar institutions are about to be established in other German towns.

MAKE WAREHOUSE OF CHURCH

Sacred Edifice at Brighton, England, Has Been Unfortunate Since Its Erection.

To serve as a cold storage warehouse for meat and eggs—such is the fate of the beautiful Church of the Resurrection at Brighton, England. Built at the expense of the late Rev. H. D. Wagner for the accommodation, it is said, of the poorer members of the congregation, and for those who preferred a ritual simpler than that of St. Paul's church on West street, this building first attracted the public attention as the subject of a curious lawsuit. Mr. Wagner planned to build a remarkably tall church, and the owners of the adjoining property, by means of a lawsuit, prevented him from so doing. Accordingly he caused deep excavations to be made, and thus secured the desired internal height. The Church of the Resurrection proved to be a great expense and was closed in 1908, being, in the opinion of the present vicar of St. Paul's, no longer necessary for the purpose for which it was built. In 1909, after prolonged opposition on the part of Rev. E. F. B. Weber, one of the trustees, it was sold. Since then it has stood empty and in disrepair, until the grotesque tragedy of its present usage occurred.—The Churchman.

Tons of Iron Lost in Rust.

One large railroad system suffers a loss of more than eighteen tons of metal daily, due solely to the effect of rust. Thus far the only known preventive is to keep the metal surface always covered with a suitable paint. Some idea of the costliness of this remedy, however, may be gained from the fact that it requires about $10,000 annually to paint one large railway bridge alone. A typical case of this kind is the Brooklyn bridge, upon which a corps of painters are constantly employed, as the weather makes repainting of one end of this large structure necessary before the workers have reached the other. Although experiments have demonstrated that pure iron surrounded by oxygen does not rust, and that some acid, especialy carbonic acid, is necessary for the production of rust, the secret of manufacturing rustless steel and iron remains to be discovered.

Lasting Joke.

How long will a good joke last? Who can tell? You have heard that one about the good sleighing in Canada, and how by putting on a pair of pajamas and sitting on a cake of ice before an open window and ringing a bell one can get the same effect, and much cheaper. Billy Emerson, the minstrel, originated that one over thirty-five years ago, and it is one that has never run down. DeWolf Hopper began to use it in his curtain speeches eleven years ago, and ever since, eight times a week forty weeks a season, he has used it and it has never failed to get a laugh. Always there are some in the audience who never heard it. Hopper figures that with the additions of a few score times at private functions he has "sprung" the chestnut 8,753 times. It is his one best bet, he says, and expects to use it as long as he is in public life.

$20 Gold Pieces a Quarter Each.

When five boys commenced to sell $10 and $20 gold pieces on the streets of North Scranton for 25 cents each, with the supply apparently unlimited, curiosity was at once aroused as to the source of supply, and the boys were taken into custody and given the "third degree." When searched the youths' pockets produced over $500 in gold coin and when questioned they admitted that they had found a "pot of gold."

The money was buried in a box in the cellar of a house formerly occupied by Peter J. Scanlon, who during his lifetime had the reputation of being a miser. There were $520 in shiny gold pieces in the box. The boys, none of whom was over eight years of age, thought they were brass medals and sold about twenty of them before being arrested.—Scranton (Pa.) Republican in Philadelphia Record.

A. H. FURLONG

TO THE PUBLIC:

You can't get the love of your old work out of your system, no matter how hard you may try. I didn't try very hard, but yielded easily and here I am.

ITS SURPRISING

That So Many Charleroi People Fail To Recognize Kidney Weakness.

Are you a bad back victim?

Suffer twinges; headaches, dizzy spells?

Go to bed tired—get up tired?

It's surprising how few suspect the kidneys.

It's surprising how few know what to do.

Kidney trouble needs kidney treatment.

Doan's Kidney Pills are for the kidneys only.

Have convinced Charleroi people of their merit.

Here's a Charleroi case; Charleroi testimony.

Kidney sufferers hereabouts should read it.

Mrs. H. Howe, 1005 McKean Ave., Charleroi, Pa., says: "Doan's Kidney Pills, procured at Piper Bros.' Drug Store, have been used in our family for backache and other kidney disorders with the best results.

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

THIS WOMAN HAD MUCH PAIN WHEN STANDING

Tells How Lydia E. Pinkham's Vegetable Compound made Her a Well Woman.

Chippewa Falls, Wis.—"I have always had great confidence in Lydia E. Pinkham's Vegetable Compound as I found it very good for organic troubles and recommend it highly. I had displacement, backache and pains when standing on my feet for any length of time, when I began to take the medicine, but I am in fine health now. If I ever have those troubles again I will take Lydia E. Pinkham's Vegetable Compound." — Mrs. ED. FERRON, 816 High St., Chippewa Falls, Wisconsin.

Providence, R. I.—"I cannot speak too highly of Lydia E. Pinkham's Vegetable Compound as it has done wonders for me and I would not be without it. I had organic displacement and bearing down pains and backache and was thoroughly run down when I took Lydia E. Pinkham's Vegetable Compound. It helped me and I am in the best of health at present. I work in a factory all day long besides doing my housework so you can see what it has done for me. I give you permission to publish my name and I speak of your Vegetable Compound to many of my friends." — Mrs. ABRIL LAWSON, 126 Lippitt St., Providence, R. I.

A good show every day at the Star. Come and we will convince you. 283-tf.

FIRE MARSHAL GIVES ADVICE

(Continued from First Page)

been tried without the promiscuous use of fire works it has been found most satisfactory as no accidents from gun powder occurred and no fires from explosion reported.

There are in all communities persons disposed to obstinacy and unreasonably persist in doing things contrary to the wishes of the majority. Such persons often cause trouble and may do so on the Fourth of July by the careless handling of fire works, which may result in injury or death of loved ones or the destruction of property.

Householders should be on guard against such persons, by being prepared for emergencies. Keep buckets filled with water and place them handy for immediate use. Members of fire departments should be interested and lend aid for a safe and sane Fourth of July. Usually this is one of the busiest days of the year and is seldom passed without injury or death occurring to some member. Be safe. Be sane, and advise and help others to be. Remember that merriment is better than mourning.

Remember that it is better to plan for the saving of life and property before loss occurs than afterwards.

Joseph L. Baldwin,
State Fire Marshal.

See the show at the Star today. It is fine. 283-tf
